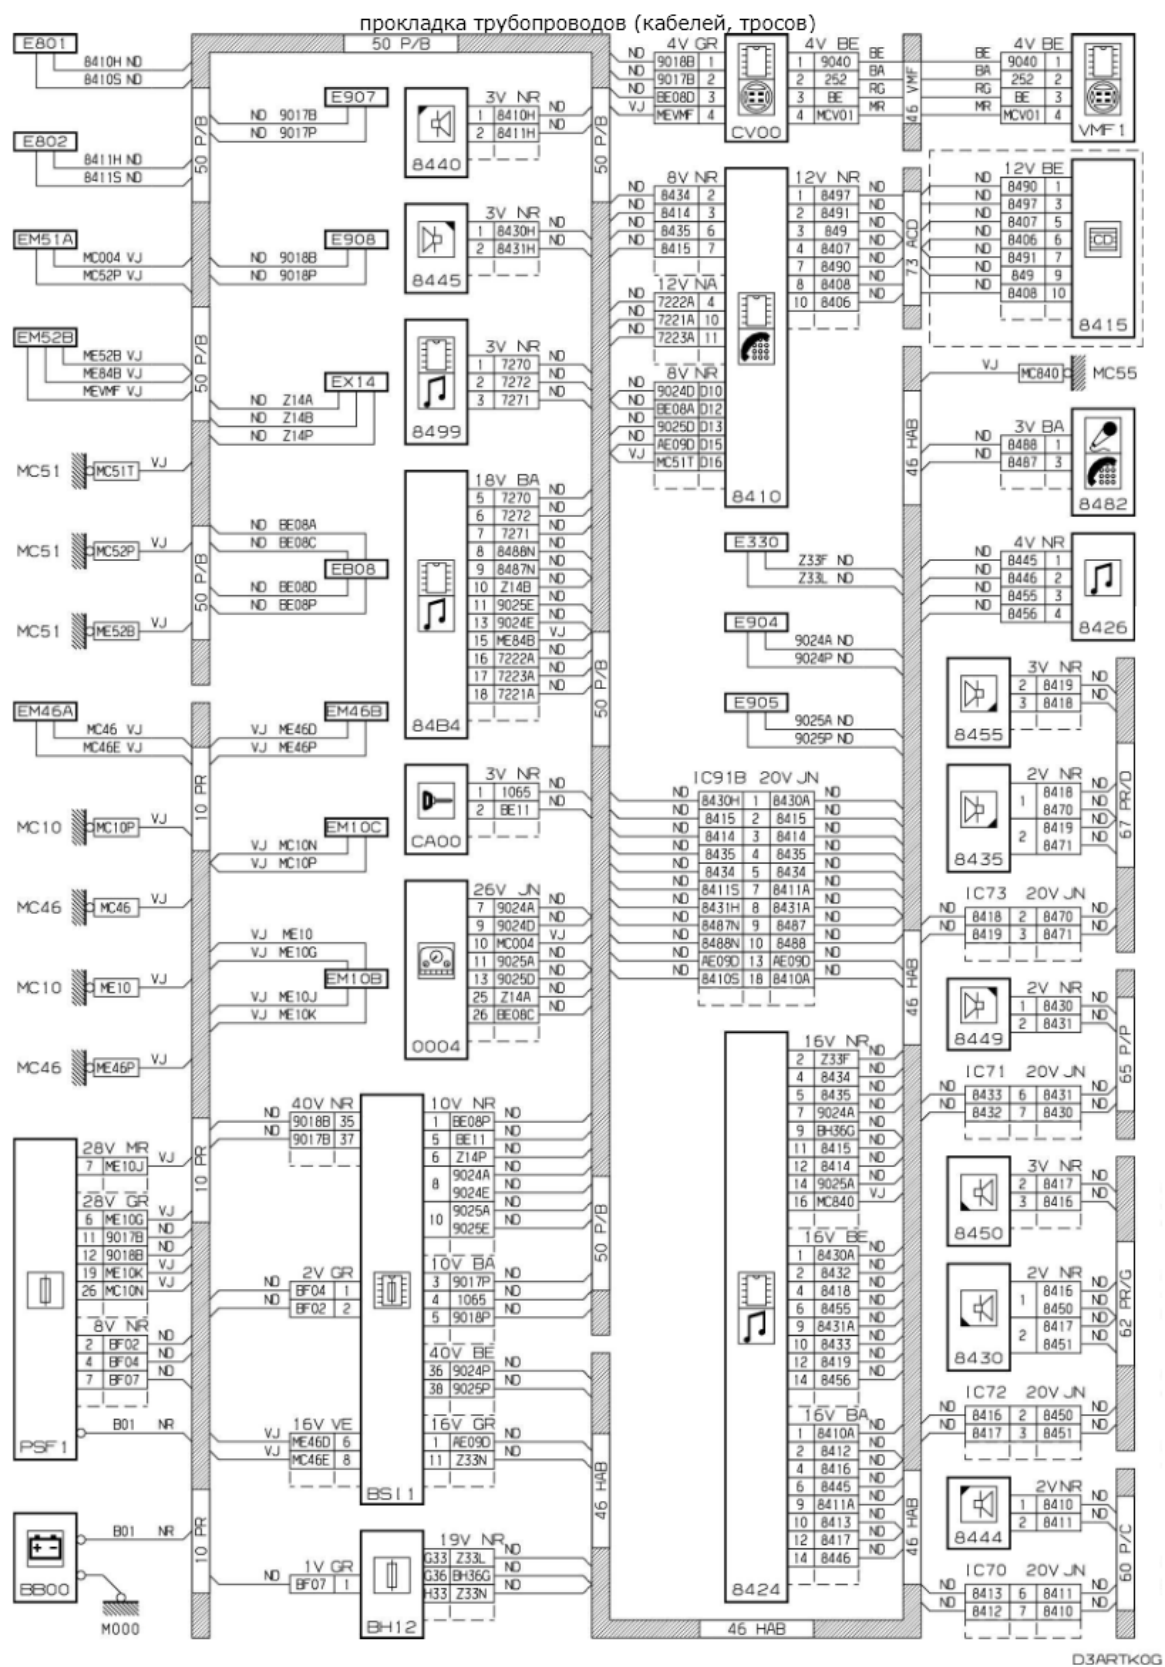

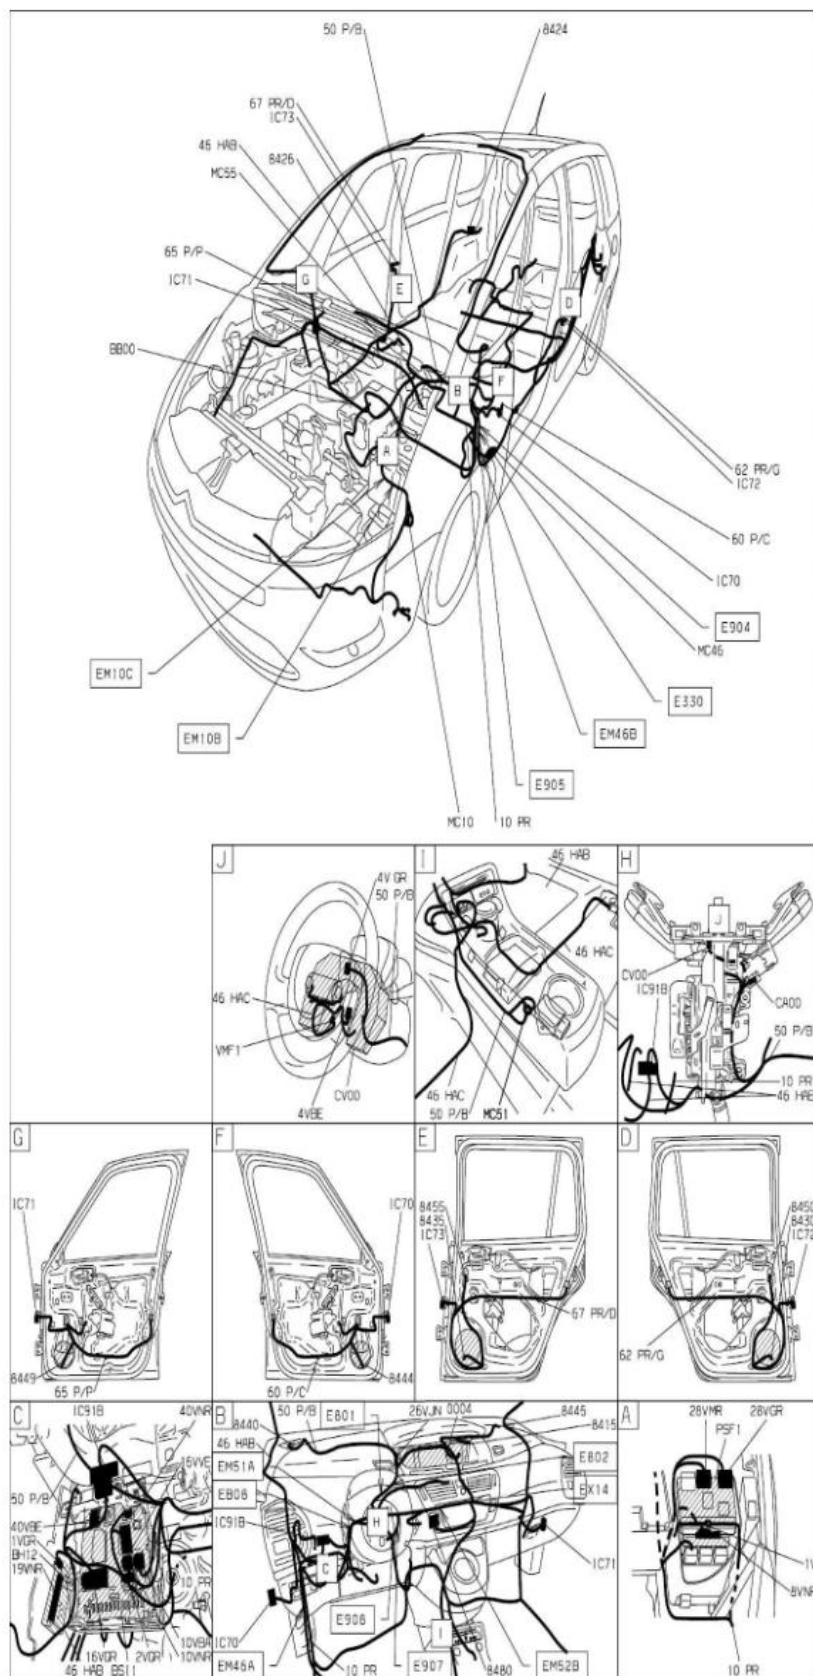

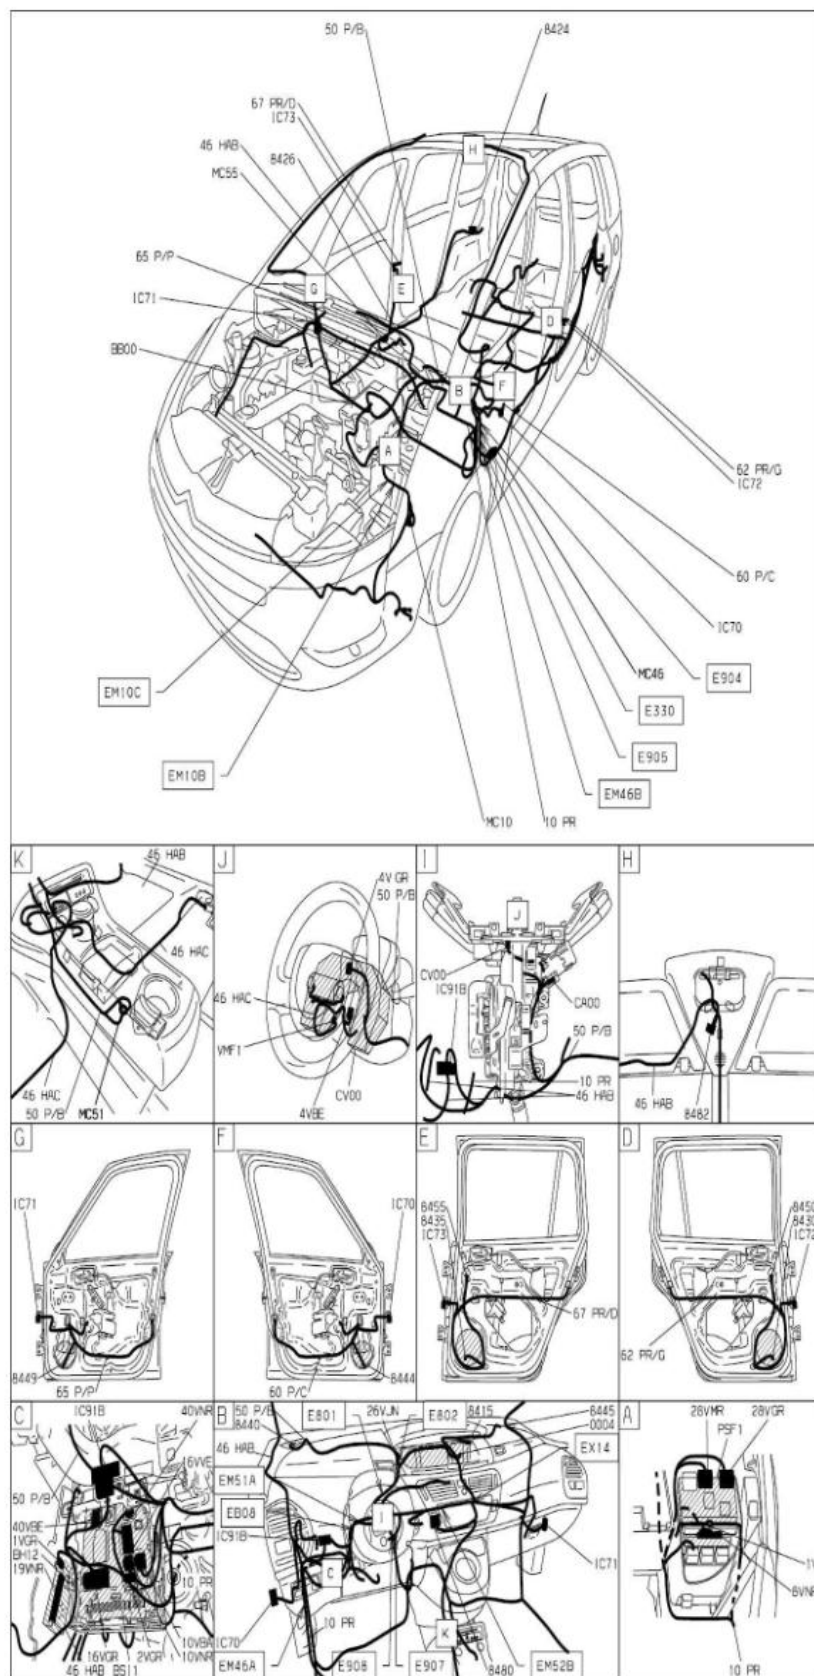

Diagram 1: A detailed wiring diagram for a 100-watt, 1000 Hz Class D amplifier. The diagram shows the internal components and their connections, including the power supply section (PSF1, BB00), the amplifier section (BSI1, BH12), and the output section (8415, 8426, 8455, 8435, 8473, 8419, 8499, 8450, 8430, 8472, 8444). The diagram is color-coded to show different signal paths and power levels. The components are arranged in a vertical column, with the power supply at the top and the output section at the bottom. The diagram is labeled with various component numbers and pin numbers, and includes a legend for the color coding.
