SET OF 2 ANTI-SKID COVERS
"SOCKS"
AUTOSOCK 645

- Использование на сухом грунте или поверхности без снега приводит к преждевременному износу лент.
- Consultation of the allocation table is strongly recommended.
- НЕОФИЦИАЛЬНАЯ ФОТОГРАФИЯ

ОПИСАНИЕ

- Эти ленты из специальной ткани позволяют временно облегчить движение по заснеженной или обледенелой поверхности, увеличивая сцепление с дорогой.

ТЕХНИЧЕСКИЕ ХАРАКТЕРИСТИКИ

- Material: Textile fibres.
- Fixing: By elastic.
- Manufacturer-approved: Yes.
- Machine washable: Yes.

КОММЕРЧЕСКИЕ ДОВОДЫ

- These anti-skid covers are made from special fibres which have the advantage of absorbing water (generated by heat from the sun or wheel friction) entering between ice or snow and the tyre, thus optimising road holding and providing exceptional drive on snow and black ice.
- Compatible with the majority of electronic assistance equipment, the anti-skid covers function perfectly with the ABS, ESP and four-wheel drive.
- Quick to install, very easy to use, of small size, do not create any noise or vibration and do not damage the alloy wheels.
- These anti-skid covers are fixed by elastic, as opposed to snow chains which are fixed by hooks.
- Conform to current regulations.
- Approved by the manufacturer after static and dynamic tests on each model.
